

Rack Sentry®

LT

Low Temperature

Rack Sentry LT rack protectors are specially formulated to withstand impact in colder environments. The Rack Sentry LT is molded from a special polymer that allows flexibility in much lower temperatures without cracking. The product has been successfully tested in temperatures down to -30 degrees C.

Rack Sentry LT guards are available in all existing sizes of the current model. The LT model is distinguished from the standard model by the bright blue straps.

Always on guard

Dependable protection

- Molded from a special polymer that withstands temperatures as low as -30 degrees C
- Patented air chamber deflects impact
- Minimizes force of tow motor impact that can damage structural integrity of racks and floors

Easy to see

- Bright safety yellow
- UV stabilized plastic prevents fading
- Waterproof and easy to clean
- Chemical resistant and non-conductive
- Easily removable for maintenance and rack inspection

Easy installation

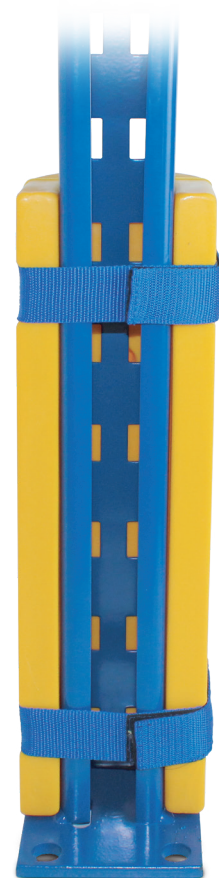

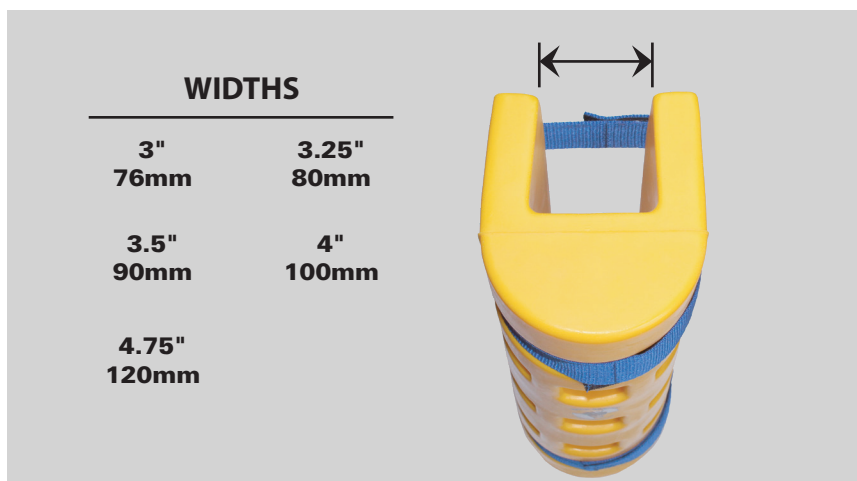

- No tools required
- Attaches to rack upright with hook and loop straps

Cheaper than repair or replacement

- Protects both inventory and structural integrity of rack system
- Installs directly to the rack upright eliminating the need to drill into the floor
- Costs a fraction of rack, floor or inventory repair/replacement
- A one-time insurance investment

Always on Guard
