

**Dependable protection.
Flexibility to fit most
every rack in every
situation.**

Instead of leaving metal racks exposed, allowing them to scratch, bend and crumple under impact, protect them with Rack Sentry. Rack Sentry absorbs the force and bounces back to its original shape whenever lifting equipment strikes. Its patented Sentry Air Cushion System is always on guard, protecting the structural integrity of your rack system, plus protecting your inventory and your warehouse floor.

**Rack Sentry
takes a
beating
so your rack
systems
don't have to.**

Rack Sentry® virtually eliminates rack damage by absorbing the force of tow motor impact, and it's:

Tougher than your tow motor

- **Rack Sentry**, a patented product, is molded from a semi-flexible and stress-crack resistant plastic
- It minimizes the force of tow motor impact that can damage the structural integrity of your racks and floors
- Nine pockets strategically placed throughout **Rack Sentry** are angled to deflect impact energy away from the rack
- **Rack Sentry** surrounds rack legs, protecting from damage at all angles

Easy to see

- Bright safety yellow
- UV stabilized plastic prevents fading
- Waterproof and easy to clean
- Chemical-resistant and non-conductive
- Removable for maintenance

Easy to install

- One person can install the lightweight **Rack Sentry** in seconds
- Simply position **Rack Sentry** around any rack upright and fasten the hook and loop straps
- No tools required
- **Rack Sentry** is easily stackable for greater protection
- Save time, labor, and the cost of other materials

Cheaper than repair or rack replacement

- Protects both your inventory and the structural integrity of your rack system
- No floor damage upon impact because it is not attached to the floor
- Costs a fraction of rack, floor, or inventory repair/replacement
- A one-time insurance investment

Always on duty

- Protects any rack under any condition, down to 32°F/0°C
- Doesn't stay dented — pops back to original shape after impact, ready to stand guard again and again

Versatility to fit most racks and profiles

Size variations accommodate most racks

- Available in various widths to protect rack uprights 3"/75mm to 4.75"/120mm
- **Rack Sentry** provides protection, no matter the manufacturer or profile
- Each piece is 18"/457mm tall and stackable for greater protection

Cutouts for racks with beams

- **Rack Sentry Cutouts** are available for 3"/75mm and 4"/100mm uprights and feature a cutaway section on the return arms to enable it to be placed over beams 5"/127mm or 7"/178mm from the floor

Rack Sentry END For end-of-rack applications

- Perfect for outside corners in high traffic areas
- Covers the front and end of the rack

From the people who invented industrial column protection.
The complete family for protecting rack systems.
