

# Column Sentry®

**FIT**

## Extension Kit

Measurable, adjustable,  
expandable.

When a standard sized column protector is just not big enough to fit, the Column Sentry FIT Extension KIT is the “go-to” solution. The Extension KIT features add on “extenders” that combine with the Column Sentry FIT Small to accommodate larger and odd sized columns.

Always on guard

There are four extension pieces in the kit. Each extension interlocks with the original column protector, like the pieces of the puzzle. Each piece adds 10" to protection coverage. Adding one extension piece to each side of a 4" x 4" FIT, the column protector now fits a 14" x 14" column. Multiple extensions can be added depending on the column size.

## Installation

- Separate the four sides of the FIT Small and interlock the extension pieces with the original column protector so they fit like pieces of a puzzle.
- Push the sides back together for a custom fit and secure to the column using the VELCRO® straps included with the kit.

## Materials

- Manufactured from expanded polypropylene – a material with extremely effective compressive strength that can sustain multiple impacts without losing integral strength.

## Additional

- Currently tested for use on solid columns only.
- Adding extension pieces to FIT Small does not compromise corner protection.
- FIT Extension KIT is designed specifically for the Column Sentry FIT – Small
- FIT Extension KIT includes 4 extension pieces (10" x 6" x 42") and 2 sets of 2" x 72" straps.

Compressive strength that can sustain multiple impacts without losing integral strength.
